Bacteriology

Test Name:	Aerobic ID
Price per Sample:	$37
Sample Type:	Swab, Fluid or Tissue
Turnaround Time:	36-72 hours
Specimen Requirements:	Bacterial culture swab with transport medium (Amies swab). Fluid or tissue in sterile container. The animal species and culture site must be specified.
Notes:	Gram stain, culture and ID only. Sensitivities can be added. Blood in LTT cannot be used for culture.

Test Name:	Anaerobic ID
Price per Sample:	$50
Sample Type:	Swab, Fluid or Tissue
Turnaround Time:	36-72 hours
Specimen Requirements:	Bacterial culture swab with transport medium (Amies swab). Fluid or tissue in sterile container. The animal species and culture site must be specified.
Notes:	Gram stain, culture and ID only. Blood in LTT cannot be used for culture.

Test Name:	Aerobic & Anaerobic ID
Price per Sample:	$81
Sample Type:	Swab, Fluid or Tissue
Turnaround Time:	36-72 hours
Specimen Requirements:	Bacterial culture swab with transport medium (Amies swab). Fluid or tissue in sterile container. The animal species and culture site must be specified.
Notes:	Gram stain, culture and ID only. Sensitivities can be added for aerobic bacteria only. Blood in LTT cannot be used for culture.

Test Name:	Antibiotic Sensitivity Only
Price per Sample:	$26
Turnaround Time:	36 hours
Notes:	Add-on sensitivity to aerobic bacteria cultured. Includes amikacin, amoxicillin/clavulanic acid, cefpodoxime, ceftiofur, enrofloxacin, doxycycline, sulfamethoxazole/trimethoprim, as appropriate for bacteria species isolated.

Test Name:	Culture & Sensitivity
Price per Sample:	$50
Sample Type:	Swab, Fluid or Tissue
Turnaround Time:	36-72 hours
Specimen Requirements:	Bacterial culture swab with transport medium (Amies swab). Fluid or tissue in sterile container. The animal species and culture site must be specified.
Notes:	Gram stain, culture, ID only and antibiotic sensitivities. Blood in LTT cannot be used for culture. Sensitivities of aerobic bacteria cultured include amikacin, amoxicillin/clavulanic acid, cefpodoxime, ceftiofur, enrofloxacin, doxycycline, sulfamethoxazole/trimethoprim, as appropriate for bacteria species isolated.
