# Make a puffin puppet!

1. Print out your puffin.
2. Color it!
3. Cut out the body and wings.
4. Tape the wings together along the straight edge.
5. Fold the wings together and make a crease about ¼" from the straight edge.
6. Put the folded wings over the top of the body and fold them upwards along the crease from step 5.
7. Tape the wings to the body.

Hooray! You now have your very own puffin puppet that can flap its wings. Be sure to bring your puffin to the Seabird Superpowers program!
